Data Sheet

Acer Vero Mouse

The Sustainable Mouse for Professionals

Made from 30% post-consumer recycled plastic, the Acer Vero Mouse is a professional-level mouse with 2.4GHz wireless connectivity and 1200 DPI sensitivity.

Sustainable Tech

The Acer Vero Mouse is constructed from 30% PCR (post consumer recycled plastic), pioneering a new era of sustainable tech for the eco-conscience user.

Professional Sensitivity

The 2.4GHz wireless signal delivers 10 meters of operating range, while 1200 DPI, universal plug and play, and an ergonomic shape for left and right handed users makes it perfect for even the most demanding users.

Smart Power Usage

Reaches up to one year of battery life with smart power management.

Premium Durability

Smooth and silent scrolling and a solid keycap gives it long-life usage and maximum durability.

Specifications may vary depending on region.

Specifications
