ICY BOX **IB-2914MSCL-C31**

Docking & CloneStation for M.2 NVMe SSD & 2.5"/3.5" SATA SSD/HDD

The new world of cloning

Finally clone 2.5" and 3.5" SATA hard disks to an M.2 NVMe. ICY BOX makes it possible! The cloning direction can be easily changed with a slide switch, then the system clones from M.2 NVMe SSD to a 2.5" or 3.5" HDD/SSD. One push of a button is all it takes to finally make your system faster.

A useful device even without cloning

Simply use the ICY BOX IB-2914MSCL-C31 as a DockingStation and conveniently access your 2.5"/3.5" SATA or M.2 NVMe SSD as external storage. Simply connect with the USB 3.2 Gen 2 combo cable via USB Type-C® or Type-A and ignite the data turbo with up to 10 Gbit/s.

Completely without tools

There is no such thing as complicated with ICY BOX. The installation of the cloning station or the change of storage media is very simple and can be done in a flash without tools. It does not matter whether the 2.5"/3.5" hard disk or the M.2 NVMe SSD is to be installed.
