System requirements

Host PC with an available USB Type-C® port
 The IB-3801-C31 is also working with computers/notebooks with Type-C® USB 3.0/2.0 and Thunderbolt™ 3 interfaces.
 The full transfer rate of up to 10 Gbit/s can only be reached, if the USB 3.1 (Gen 2) protocol is supported.

ICY BOX **IB-3801-C31** USB 3.1 (Gen 2) enclosure for 1x 3.5" SATA drive

Fast data transfer

The connection between host PC and external enclosure is realized by a USB 3.1 Type-C® port. Thanks to the USB 3.1 protocol a high data transfer rate of up to 10 Gbit/s can be enabled.

"Turnkey ready" - Very simple

Here is where HDDs are installed and exchanged. By toolless assembly thanks to spring technology in the tray, HotSwap and Plug & Play, installing hard drives is a breeze, and the lock on the hard drive tray provides security and also protects against accidental removal of the hard drive.

A quiet pleasure

That is what you receive with this ICY BOX since the high-quality aluminium is solely responsible for the dissipation of heat to the environment. So no loud and disturbing fan annoys while working or watching movies.
