<b>Max arm extend</b>	825 mm
<b>Max arm height</b>	949 mm
<b>Table thickness</b>	For clamp base: 10 – 60 mm For table feed-through: 10 – 60 mm

## ICY BOX **IB-MAG103B-T** Professional microphone boom arm with desk mount

### Flexible

The microphone arm offers a flexible microphone position that can be aligned according to your wishes. This is helped by the 360° rotatable boom, which is also equipped with a rotary knob for fixing the desired position. The foldable scissor arm allows for compact storage as well as easy transport of the microphone arm.

### Everything under control

The microphone arm can be securely attached to the desk top in two ways. If your desk has a recess, you can attach the monitor arm to the desk top using the desk grommet. Otherwise, use the clamping foot. In both cases, the tabletop thickness can vary from 10 to 60 mm. The accessories are included in the scope of delivery.

### For almost any microphone

The IB-MAG103B-T comes with a 3/8 and 5/8 universal thread connection. This means you can easily attach almost any common microphone to the thread. A plus are the double suspension springs in each arm segment, which protect the microphone from falling down or shocks.
