The solar-powered wireless keyboard that makes battery hassles a thing of the past in a streamlined, comfortable design.

Light-powered keyboard

It doesn't get more hassle-free than this. This keyboard charges itself whenever there's light—and stays charged for at least three months in total darkness—so you can say good-bye to battery hassles.

Only 1/3 -inch thick

With sleek lines and a thin profile, this stylish, streamlined keyboard adds style to your workspace—whether you've got a laptop or desktop.

Feel-good typing

Combining the best of traditional keyboards, laptops and a Logitech-only concave key cap design, you'll enjoy faster, quieter, feel-good typing—hour after hour.

Advanced 2.4 GHz wireless

So you can work or play in more places—like your comfy couch—the long-range wireless connection virtually eliminates delays, dropouts and interference.

Logitech Solar App

Want to know how much battery power you have? Or how much power you're getting from your desk lamp? The Logitech Solar App can help.

Logitech Unifying receiver

The tiny receiver stays in your laptop. Plus, you can easily add a compatible wireless mouse or keyboard—without the hassle of multiple USB receivers.

Plug-and-play simplicity

Setup takes seconds—you simply plug the wireless receiver into a USB port on your computer and start using your keyboard right away without software.

Small steps, bright future

From the PVC-free construction to the fully recyclable box, this keyboard is designed to minimize its footprint.
