

Delock USB 2.0 Bluetooth 4.0 Adapter USB Type-A

Description

This USB 2.0 Bluetooth adapter by Delock enables a wireless communication or data transfer e.g. between two PCs or a PC and a mobile phone or network. This Bluetooth adapter can remain plugged in the laptop since it stands out only 7 mm from the USB port.

Supports A2DP

A2DP means "**Advanced Audio Distribution Profile**" and is used to ensure that **audio signals (stereo)** can be transmitted in addition to pure data transmission during wireless transmission via Bluetooth. The stick is therefore an ideal supplement for connecting e.g. the laptop with Bluetooth capable headsets.
